

I object to the National Assoc. of Broadcasters attempt to stifle satellite radio from free market competition. I as a subscriber (by choice) I pay a fee for crystal clear, commercial free reception. I suggest if the NAB wants to maintain their listenership that they get off their duffs and put programming on the air worth listening to. This smear campaign hosted by the NAB is proof they have no interest in improving the product they put on the air. Crying to public for protection is exactly what television proclaimed before cable showed the world a better picture. Thank you
